SUMMARY

Results-driven Software Engineer with 1+ year of professional experience and a Bachelor's degree in Computer Science from the University of Colombo School of Computing. Experienced in developing scalable backend systems and RESTful APIs using Java, Spring Boot, and Python. Skilled in PostgreSQL, MySQL, Docker, Git, and cloud technologies, with a strong understanding of software development, database management, and system optimization. Passionate about building secure, high-performance applications and delivering reliable software solutions in collaborative environments.

PROFESSIONAL EXPERIENCE

Software Engineer

August 2025 – Present

Real Customer Project with JDNBrothers (Pvt) Ltd

- **Designed and developed** a full-scale transport, finance, and inventory management system.
- **Built scalable REST APIs** using Spring Boot to support real-time fleet tracking.
- **Integrated IoT** and third-party systems (CCTV, GPS tracking, fuel monitoring) for real-time fleet management.
- **Deployed containerized applications** on AWS using Docker and implemented CI/CD pipelines.
- **Improved system performance by 30%** by resolving bottlenecks.
- **Technologies:** Java, Spring Boot, React.js, AWS, Docker, GitHub Actions, Google API.

Associate Technical Consultant (ABAP)

November 2025 – Present

Altria Consulting

- **Engineered backend development logic** using SAP ABAP for scalable ERP enhancements.
- **Architected database handling routines** and customized relational data access layers.
- **Refactored core algorithms using DSA principles** to minimize memory and maximize efficiency.
- **Executed deep query optimization** within SAP architecture to eliminate database bottlenecks.

EDUCATION

University of Colombo School of Computing

May 2023 – Present

Bachelor of Science in Computer Science (GPA: 3.4/4.0)

S.B. Herath National School

2008 – 2022

A/L Subjects: Mathematics (A), Physics (B), Chemistry (B) — Z-Score: 1.69

NAITA (National Apprentice and Industrial Training Authority)

2022

Graphic Designing – NVQ Level-4

PROJECTS

brainMap – Project Management & Mentoring Platform

Technologies: Java, Spring Boot, Next.js, Supabase, Docker, AWS EC2, ECR, GitHub Actions

GitHub: <https://github.com/brain-Map/>

- An all-in-one collaboration platform designed to unify project management, mentoring, real-time communication, and community engagement into a single cohesive ecosystem.
- **Designing and developing backend services** with Spring Boot, implementing a scalable RESTful API architecture, and integrating PostgreSQL with Supabase authentication to ensure secure, reliable, and real-time data management.

- **Implemented real-time communication** capabilities to enable seamless interactions and collaboration.
- **Built CI/CD pipeline** using GitHub Actions and deployed via AWS EC2 & ECR.

High Availability Web Cluster

Technologies: Apache Tomcat, Squid, Keepalived, MySQL, Linux

GitHub: <https://github.com/NadunMN/High-Availability-Web-Cluster>

- **Implemented load balancing** using Squid for both HTTP & HTTPS traffic.
- **Designed and deployed** a high availability web cluster using Keepalived (Virtual IP failover for redundancy).
- **Strengthened knowledge** in system administration, networking, and DevOps practices.
- **Automated failover testing** and load balancing to ensure uninterrupted service delivery.

Kottu Labs – Restaurant Operations and Order Management System

Technologies: PHP, MySQL, JavaScript, AWS, Docker

GitHub: <https://github.com/NadunMN/Kottu-Labs>

- **Developed a Comprehensive Restaurant Management Platform** using a custom-built PHP MVC architecture with a MySQL database.
- **Implemented role-based access control** with a middleware authentication system and route protection for secure user management.
- **Implemented version control workflows** using Git and GitHub to track changes and collaborate efficiently.
- **Optimized database queries** and server configurations to enhance performance and responsiveness.

TECHNICAL SKILLS

Programming Languages:	Java, Python, JavaScript, C, C++, SQL, ABAP, Bash, PHP
Frameworks & Libraries:	Spring Boot, React.js, Node.js, Express.js
Cloud & DevOps:	AWS (EC2, ECR), Docker, GitHub Actions, CI/CD, Kubernetes
Databases:	PostgreSQL, MySQL, OpenSQL, MongoDB, Supabase
Tools & Platforms:	Git, Postman, Linux, SAP ERP
Core Concepts:	RESTful APIs, Microservices, Object-Oriented Programming (OOP), Networking, System Design, Agile, Scrum, Data Structures and Algorithms, Unit Testing

CERTIFICATES

- AWS Certificate – AWS Educate Introduction to Cloud 101
- HackerRank Certificate – Problem Solving (Intermediate)
- HackerRank Certificate – SQL (Advanced)

SOFT SKILLS

- Strong problem-solving ability and analytical thinking.
- Excellent communication and collaboration skills; works well in team environments.
- Adaptable and quick to learn new technologies and processes.
